Website Accessibility Workbook

Review structure, keyboard use, visuals, forms and media

Practical workbook · Version 2.0 · July 2026

Structure and keyboard

- Check one clear H1 and logical heading levels.
- Use native buttons, links and form controls.
- Complete priority tasks with keyboard only.
- Verify visible focus indicators.
- Confirm skip link and landmarks.

Notes

Visuals and content

- Test text and control contrast.
- Zoom to 200% and check reflow.
- Avoid colour-only meaning.
- Write meaningful link text.
- Review alternative text for images.

Notes

Forms and testing

- Connect labels and instructions to fields.
- Write corrective error messages.
- Preserve data after validation errors.
- Run automated checks on templates.
- Include assistive-technology testing where risk warrants.

Notes
